P2W trash. Works on windows 10 thanks to receant update!!! I played years ago and got 1 shotted by a credit card user with glowing gear. Graphics are decent. Game is dying due to the patches that add more P2W garbage. They will pull the plug on this disaster ^_^ They are selling the game again to an even worse publisher expect NO MORE PATCHES JUST P2W TOP UP\u2665\u2665\u2665\u2665\u2665. I need more chips.. Interesting!. A game that leaves you doing a lot of guess work with no tutorial. If you aren't used to builder games, don't buy it as it will just frustrate you. Learning curve is steep and takes time to get used to it and the controls. Not worth full price I bought it at 51% but still contemplating if I want my money back or not. If you have the time and patience to put into the game it is worth it. If you want a game you can just quickly jump in and play this isn't it.. This is a simulation resource management title, where you will build a tall city, while managing your resources at the same time.

Playable in both PC and VR, you will be building various facilities, such as an office (of various sizes), residentials, parks, museums, school, hotel, restaurant, parks, everything to keep your occupants happy and satisfy their demand while racking in those cash to build more.

control is intuitive in VR, and gameplay is easy. but resource management part is a little hard. There's also a sandbox mode where you can just build it whatever you want instead of following clearing missions for those coins.

I forget but my friend bought this game when i first got steam im pretty sure so it must be good my friend woulld never lleave me astryas. I really wanted to like this game. I did. But the translation is done so badly it ruins the whole story. If you can enjoy a story written in broken english then this is the game for you! If not, it's probably best to skip it.. Scray real scary my utter love for this game. It took me a bit to get used to the game as modern games have seriousy dumbed me down but i thank god that by chance i came across this little gem!!!! This game is for anyone who likes it slow and steady but with an hidden addictive streak. Totally love it.. I like the Class 68.

The sounds are quite good and the info screens work! The speedometer looks cool and the MK2s are decent. However, the air brakes are very sensetive. One tiny push and you go straight into emergency! Also, just 1 livery? I know this was released in 2016 but you still had the standard DRS livery.

I recomend this addon. **50% FOOK LIKE FOKING RABBITS IN THE FOKING HUTS FOR SPAWN MOAR FOKING PEASANTS**
30% OP archers
20% Wait your enemies

Very funny, good concept, nice arts. Campaign is a bit short, like 2-4 hours. The focus of the game should be crush real thinking people, but multiplayer is a bit dead atm. Feel free to add me to friends and challenge me, thanks :) Also some bugs here and there reading other reviews - I noticed one on the achievements too, if the enemy chicken out, it doesn't count it as a victory. I got one multiplayer game bugged too, I crushed my enemies, but no victory. Then I tried to conquer each tile till my enemy got (rightly) bored and chickened out. Then still no victory. Then I crushed my keyboard. Still good game, hope they do a good bugfixing in the next month, and hope more people will purchase it for adding multiplayer population.. For me this one is a nice VR Zombie game. You need to defend your little base with a bow, handgun and an AK. The reloading system is also nice. I like also the zombies.

There is also a tutorial to manage the weapons.

For now it is early access, but it is good playable.
Some stuff was written in Chinese language, but most of it is translated to English

I hope there will be other area's, weapons. Because for the current content only the price is a little to high.

I made a movie with the tutorial and the base defending:
https:\/\/www.youtube.com\/watch?v=6FTcnCr6oag. Pretty good looking, need playes to play with tho. TLDR; Cool concept, for a pretty niche community. Unfortnately there's no singleplayer mode and finding other players can take upwards of 10 minutes. Controls can feel unresponsive, but gameplay is genuinely fun. Online community feels dead and the game lacks varitey and customisability.

I imagine they'd also be rolling out more updates in the future for more content, as it is there are 6 tracks and 6 different cars. When you start out you have no cars theres 6 to pick from and you have a choice of the first two as they are under 200K which is what you're given when you start out. The car models do look pretty good and was impressed with the details they were able to put into the models. After buying the car you want, take it to your garage and with whatever spare cash you have left you might be able to get an upgrade. The upgradeable aspects of your car are the brake, ECU, Exhaust, bodywork, suspension, KERS, spoiler, cooling and a few others. Upgrades will change the car in terms of fuel economy, top speed, accleration, drag, braking power and do matter. For instance the car I was using was kitted to last only about 25km's without pitting but I had constantly more power to use and ended out on top. Most races won't be longer than 50km's, also note drivers can be more fuel economic whilst driving.

Once you're actually in-game it's pretty fun, you instruct your AI driver around and tell him when to use KERS, push harder, when to change the car's fuel map, pitstops and block. Controls can feel like they are unresponsive at times but that's due to driver stats which can be upgrades with experience points.

Experience points can be used to increase the speed of certain aspects of your pitstop, increase the skill of your driver; how confident he is with braking and overtaking and how much speed he can carry through corners. You also have a manager who handles all your sponsorship contracts, you can give him greater chance of securing a contract and he can land better contracts

for you aswell.

Contracts themselves aren't overly fun to handle. You're given 10 time units and every action uses a certain amount of time units, time units are replentished after each race. Pretty easy mechanic but monotonous is a good way to describe sponsorship (10\/10 immersion there). To actually land a deal you need to call up the sponsor which you might or might not get through to. Once you're in you can invite them out to dinner, send them gifts, give a presentation on your raceteam few other options I've forgotten. Each option will better the relationship between you and whomever you're chasing up.

Once a you manage to squeeze out a contract offer you can change the aspects of the contract, how much you get paid, for how many races and what position you need to come in to adhere to those conditions of receiving the funds.

All up I would recommend this game if they added more varitey and the online community was bigger, it's a fairly niche market so this game may never live up to it's full potential. In it's current state I wouldn't recommend this game.

Apologies for the length of the review, it all got a bit out of hand. Cheers.. Laserlife is a game for people who need a break from everything else, listen to very calming music, and if you just lost that Counter Strike game. It enables the mind to succeed in collecting memories but if you miss one, you do not get upset. This game is a definite buy for anyone but maybe not at the price of 15 dollars. I bought this game during a sale in which it was lowered to 2.54 dollars. It is a great game nonetheless but here are some pros and cons

+Very calming and relaxing gameplay
+Good Music
+Visually amazing

-Short game but still fun
-15 dollars
-You need a controller
Overall the cons arent completely terrible but I do suggest buying it in a sale. If you buy it because of this review please leave a thumbs up. It is a good game! Enjoy
